- Unreal Engine 5
- UEFN
- Maya
- Substance Painter
- Perforce Revision Control
- Diversion Revision Control
- Photoshop
- Illustrator

GAMEPLAY & SYSTEMS DESIGNER

stewpified.github.io/StewartPortfolio/

EXPERIENCE

GAMEPLAY & SYSTEMS DESIGNER FOR "CATFISH!" WITH FABLED HERON STUDIOS

Designing interactions and systems for fishmongering. Making use of tools like data tables and blueprint interfaces to build logic for modular and scalable asset creation. Created components for plug-and-play style level design.

2025 - Present

SOLO DEVELOPMENT OF GAMES BUILT INSIDE UEFN

Spleef But Better

2023 - Present

Designed an arena-style shooter with a focus on destruction and environmental damage instead of classic FPS or TPS mechanics. Created systems for randomized level selection and a minigame roulette system. 30 minigames, custom VFX-based cosmetics, and more.

Block Party: Total Destruction

2025 - 2026

Designed an arena shooter with a mixed objective of PvP and base destruction. Created a "destruction economy" that updates the loot pool as the game progresses. Iterative design and updates to simplify the experience, creating a fast-paced, easy to understand game that is highly competitive.

Box Fight Blitz / Cracked Colosseum

2024 - 2026

Redesigned the established concepts of Zone Wars and Box Fights and created a fresh arena shooter that combines the games into a seamless experience. 2-phase gameplay with a small economy based on eliminations. Iterated heavily on level design, completely rebuilding the arena every 2-3 months for content updates.

WORK EXPERIENCE

Team Member at Whole Foods Market (Meat Department)

2025 - Present

- Retail Work
- Customer Service
- Food Safety & Processing
